National Range Operations Directorate  
Analysis and Computation Division  
White Sands Missile Range, NM 88002  
USA

April 27, 1978

Dear Jimmy:

After many years, you might be amused to read the attached speech written for the forthcoming hydrologists' conference on Kalman filtering. They are a bit late in getting into the act, but better late than never. I would be very pleased to have your comments. Now I am spending a lot of time each year in Switzerland, but I still recall with nostalgia desert sun at White Sands and the grandeur of the landscape.

I hope you are all doing well and that the WSMR is continuing its analytical work in the tradition of Mr. Hintze.

With kindest regards,

*Rudolf Kalman*  
R. E. Kalman
